

Jim Price

A mechanical engineer working at the University at Buffalo, lives in Amherst with his wife, 2 boys and golden retriever. Jim has been skiing and snowboarding for three decades and is glad to share the winter joy with his family at the Buffalo Ski Club. His family started as trial members 3 years ago and joined BSC the following year. Although it was an easy decision to join BSC, he would look for ways to make it an even easier choice for more families to join. Jim is currently on a technical society board and has been a trustee at his church. When he is not skiing he is running, brewing beer, or keeping the family's 60 year old house from falling apart.

Anthony Lopes, P.E.

Professional Engineer, New Your State Department of Environmental Conservation

I grew up near Lake Placid NY, UB Alumni, met my wonderful wife, Maureen Callahan, and live in Orchard Park with six kids. My wife became a BSC member around 2003, I started out as a Ski Instructor (PSIA L1) at Holimont, and in 2013 a Ski Instructor at BSC. Last fall I completed the Outdoor Emergency Course for National Ski Patrol and this year have joined the National Ski Patrol at BSC.

I love the BSC community, continually promote it, and enjoy watching my now 4 and 6 yr old girls learn to ski in adventure kids and mountain ranger groups. My 2 yr old son is next. Our 12 yr old still enjoys skiing, our 14 and 17 yr olds are involved in other activities that have taken them away from skiing.

I am interested in becoming a BSC Board member as a means to give back to the club for the great experiences we've had and will continue to have. I will work with other Board members to improve upon the BSC experience, formulate new ways to utilize our facilities and its unique setting throughout the year, while aiming to ensure the clubs prosperity and affordability for the enjoyment of future generations.
